FIG. 4B

A geometric diagram showing a triangle with vertices $T1$, $T2$, and $T3$. The vertices are represented by shaded circles. The triangle is divided into several smaller regions by lines connecting internal points 182 , 190 , and 194 to the vertices and to each other. The diagram includes various labels for segments and angles:

- Segments: 2 , 3 , 4 , 6 , 7 , 10 , 16 , 192 .
- Angles/Expressions: $0(+4)$, $7(+4)$.
- Other labels: 182 , 190 , 194 , 196 , 198 , 200 .
